LinkedIn | GitHub

SKILLS

- **Languages**: SQL, Python, PySpark
- **Visualization**: Power BI, Tableau, Excel
- **Databases**: SQL, Oracle, Azure SQL Database
- **ETL Tools:** Azure Data Factory, Azure Databricks
- **Data Storage:** Azure Data Lake, Azure Blob Storage
- **Platforms**: Jupyter Notebook, Visual Studio Code, Microsoft Azure Cloud
- **Soft Skills**: Rapport Building, People Management, Excellent Communication

EXPERIENCE

DATA ENGINEER | TCS
May 2022 - Current

- Engineered ETL processes using Azure Data Factory, integrating and transforming data from 5+ sources, which boosted pipeline efficiency by 30%.
- Optimized batch processing with Azure Databricks, shortening data processing time by 25%.
- Collaborated with Microsoft Azure Cloud services, including Azure SQL Database, to streamline data workflows, improving integration and management by 20%.

DATA ANALYST | CGI
April 2020 - April 2022

- Crafted complex SQL queries and fine-tuned data workflows, boosting reporting accuracy by 25%.
- Applied data visualization techniques to demonstrate complex insights, enhancing stakeholders' decision-making by 40%.
- Performed data transformations and analysis using SQL and PySpark, improving data quality by 29%.

JUNIOR DATA ANALYST | CGI
April 2018 - April 2020

- Identified areas of improvement through customer data analysis, boosting profitability by 8%.
- Conducted data validation, data cleaning and designed interactive dashboards using SQL and Power BI.
- Streamlined data collection and reporting procedures, reducing processing time by 20% and enhancing operational efficiency.

DATABASE SUPPORT ENGINEER | CGI
December 2016 - April 2018

- Developed database systems and implemented efficient indexes and views, accelerating data retrieval speed by 40%.
- Automated data manipulation tasks with stored procedures and DML queries, boosting operational efficiency by 30%.
- Resolved application and database issues, achieving a 90% resolution rate within agreed timelines, minimizing downtime and enhancing service reliability.

PROJECTS

Retail Data Integration and Analysis

- Constructed data pipelines with Azure Data Factory, extracting, transforming, and loading sales data into Azure Data Lake and Azure SQL Database.

- Processed large datasets using Azure Databricks, performing data transformations and applying business logic, shortening processing time by 30%.
- Enhanced query performance by 20% through structured querying in Azure SQL Database, while leveraging Azure Data Lake for scalable data storage.
- Created dashboards to visualize sales trends and KPIs, improving decision-making efficiency by 20%.

Openreach Performance Optimization and Reporting

- Analyzed historical performance data to uncover patterns and presented findings to business users.
- Automated and refined processes, reducing manual efforts and report generation time by 30%.
- Performed scheduled data refreshes to ensure data quality and achieve 100% accuracy.

Workforce Appointment Booking System

- Enhanced database performance, achieving 10% faster query execution time during peak usage.
- Mentored and cross-trained 5 team members, sharing domain knowledge.
- Monitored and controlled user access to the database to maintain data security.

EDUCATION

Annamalai University, Tamil Nadu
B.E. in Mechanical Engineering
August 2012 - June 2016

CERTIFICATIONS

- Databricks Lakehouse Fundamentals (Databricks Academy) | CERTIFICATE
- Foundations of Data Science (Learnvista) | CERTIFICATE
- Business Analyst and Data Analyst Certificate (Learnvista) | CERTIFICATE
- PWC Power BI Job Simulation (Forage) | CERTIFICATE
- Tableau and Power-BI (Learnbay) | CERTIFICATE
